

Figure B5a. The distribution of all ling (left panel) caught (grey dots) and those examined for diet (black dots) in research trawls 1960–2000. N, number of fish examined for diet.

Figure B5b. The length frequency of ling where feeding data was recorded. Fish with empty stomachs are presented as white bars and fish containing prey items as black bars. Areas are defined on p. 9. n, number of fish examined for diet.

Figure B5c. The importance of major prey groups in the diet of ling examined on research trawl surveys. Fish size groups are arbitrary designations. Areas are defined on p. 9. n, number of fish examined for diet.
